

LUCAS GONTIJO

Software Engineer | Full-Stack Developer

Seville, Spain gontijoguimaraeslucas@gmail.com +34 717 719 678 [linkedin.com/in/lucasgont](https://www.linkedin.com/in/lucasgont) lucasgont.github.io

I turn complex requirements and business needs into practical, production-ready solutions. I specialize in full-stack web development, building scalable applications across the frontend, backend, APIs, databases, and cloud infrastructure. Experienced in developing robust, maintainable systems with a strong focus on software quality, performance, security, and scalability.

TECHNICAL EXPERTISE & CORE COMPETENCIES

Software Full-stack Development, Software Architecture, End-to-End Feature Development, Scalability, Security, Performance Optimisation

Frontend React, Next.js, TypeScript, JavaScript, CSS, Tailwind CSS, Sass, Responsive Design, SEO Optimisation, UI/UX

Backend Node.js, Express.js, REST APIs, Business Logic, Authentication & Authorisation, WebSockets, Caching

APIs & Integrations Third-party API Integration, Stripe, Payment Systems, Instagram, TikTok, OpenAI, Gemini

Databases & Data PostgreSQL, MySQL, Relational Database Modelling, Database Design, Query Optimisation, Data Persistence

Cloud, Infrastructure & DevOps Microsoft Azure, Google Cloud, Docker, Linux, Render, Vercel, CI/CD, GitHub Actions

Engineering Practices Git, GitHub, Agile/Scrum, Version Control, Feature Planning, Technical Documentation, AI-Assisted Development

Collaboration & Leadership Technical Coordination, Developer Onboarding, Cross-Team Collaboration, Code Reviews, YouTrack, Figma

PROFESSIONAL EXPERIENCE

Vivage Clinique | Freelance Full-Stack Developer · Dec 2025 – Apr 2026

vivage.pt

- Led the complete development lifecycle of the company's web platform, from requirements analysis and Figma prototyping to backend architecture, cloud infrastructure and production deployment.
- Built and deployed a multilingual corporate platform using Next.js, React, TypeScript and PostgreSQL, including 30+ pages and dynamic treatment catalog architecture.
- Implemented bilingual internationalization (PT/EN), dynamic routing and SEO-focused architecture to improve discoverability and scalability.
- Managed cloud infrastructure and production deployments using Render, optimizing performance, scalability and operational costs.

Filmer | Full-Stack Developer Intern · Dec 2025 – Apr 2026

filmer.es

- Developed and implemented full-stack features for a SaaS marketing platform using React, TypeScript, Express.js and PostgreSQL.
- Designed and implemented a complete new user system ("influencers"), including frontend flows, backend logic and relational database updates.
- Built key business features including Stripe subscriptions, metrics paywall systems and real-time chat/file management improvements using Socket.io.
- Contributed to platform scalability, performance, SEO and security improvements while participating in production deployments on Render and Google Cloud.
- Led technical coordination across the development team, including code reviews, task definition, feature planning and onboarding documentation in YouTrack, helping structure development workflows and accelerate onboarding for new developers.
- Expanded platform capabilities through third-party API integrations with Instagram and TikTok, supporting a 2x increase in users.

Beehackers | Web Development Intern · Jan 2025 – Jun 2025

- Learned cybersecurity fundamentals including vulnerability assessment, Linux virtualized environments and secure web development practices.
- Explored practical applications of AI-assisted workflows in security and development environments.

EDUCATION & CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) · Issued May 2026

Cloud computing fundamentals including Azure services, pricing models, and infrastructure management.

learn.microsoft.com/es-es/users/lucasdevilagontijoguimares-6335/credentials/b94fdca1cd5a1883

Higher Technician in Web Application Development (DAW) · Sep 2024 – Apr 2026

FESAC, Seville, Spain

Full-stack web development including frontend technologies, backend architecture, databases, and deployment practices.

Network Fundamentals Course (TCP/IP) · Issued Feb 2025

Comprehensive understanding of TCP/IP protocols, network architecture, and data transmission fundamentals.

openwebinars.net/cert/Cd9I

Aerospace Engineering (Incomplete) · Sep 2019 – Jun 2022

Universidad Rey Juan Carlos, Madrid, Spain
